

## STAINLESS STEEL VESSELS & HYGIENE UTENSILS

Vessels and utensils are available in grade 304 with some items also available in grade 316 material – grade 304 for everyday use with non-corrosive substances and grade 316 when protection against corrosive substances is required.

The advantage of choosing the Unitech range of vessels and utensils is that we are able to modify our standard product by fitting outlet valves, pouring spouts, mobile frames, jackets (either steam or electrically heated) and toggle clamps. This allows cost savings to be passed onto you, the customer.

# VIKAN HYGIENE SYSTEMS

Unitech are an approved distributor of the popular Vikan Cleaning Solutions range. Below and overleaf are a selection taken from their extensive product range. Please contact us for a full Vikan catalogue, from which we would be pleased to quote for any item upon request.

## Colour Coded Cleaning System

Prevent the spread of bacteria - with colour coding.

Vikan Hygiene System has developed its range to meet the specific requirements set out by the Food Industry combining efficiency, ergonomics, design and safety in one unit.

Hygiene depends strongly on cleaning, which has to be much more than just efficient. It must also ensure that bacteria from each department is not carried from one to another.

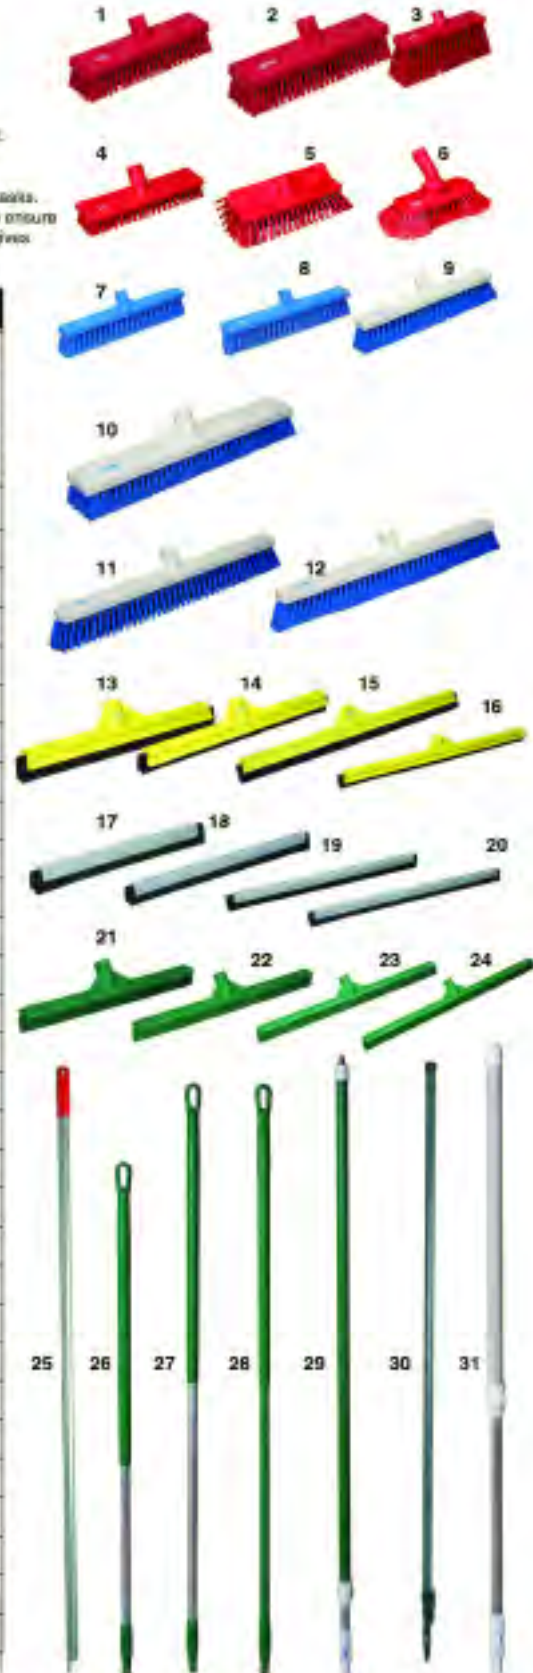

Cross Contamination can be minimized by using different tools for different cleaning tasks. The wide range of cleaning tools in the Vikan Hygiene System gives you the ability to ensure that the correct tool is used for every application. The full colour coding of products gives additional security that the appropriate products are used in the correct areas.
