

# Case Study: Analytical Laboratory Furniture

**Project:**

**To provide analytical laboratory furniture for an energy drink manufacturer.**

Unitech Engineering were involved in a construction project for a large energy drink manufacturer. Unitech were commissioned by the construction company to design and manufacture stainless steel laboratory furniture for their client in Gloucester. Used for analytical testing under laboratory conditions, our fabrications are fully welded to provide a hygienic, easy to clean design. A number of floor cupboards, benches and sinks provide the ideal working area for the laboratory.
